

The head of Women's consulting department is Kristina R. Tumasyan, obstetrician-gynecologist.

The department is situated on the 1st floor. The department is responsible for:

- Registration and check up of pregnant women
- Control over their health state while pregnancy
- Psycho-physiological training before childbirth
- Regular medical check up, diagnostics of a variety of gynecologic diseases and treatment of women of fertile, premenopausal and postmenopausal ages
- Family planning, consulting on prevention of abortions and following complications, contemporary contraceptive methods, examination of hormonal profile
- Awareness raising activities on sexually transmitted infections and their treatment
- Researches on early diagnostics of female oncological diseases and their prevention

Our department houses highly qualified experienced obstetricians-gynecologists and well trained mid level personnel.

The department of Women's consulting has established a Maternity school aimed at providing skills and knowledge necessary for successful delivery and psycho-physiological training before childbirth.

Classes are free of charge and are organized in groups. Five classes are provided by the state.

MC Shengavit also offers paid lessons in the Maternity school providing more detailed knowledge about pregnancy; sexual life peculiarities while pregnancy and other aspects of pregnancy and maternity.

The lessons are delivered by our leading specialists and heads of services by unique training methods.
